PleaseTech Ltd

What will we cover?

- OpenSpace reviewflow

    - Overview

    - How it works

    - What environments support OpenSpace reviewflow

Overview

- OpenSpace reviews enable an uncontrolled co-authoring session in Microsoft SharePoint. This is particularly useful in the pre-review stage, where a small team of participants may need to develop the document content and wish to work in an uncontrolled environment with full Microsoft Word capabilities prior to the document moving into a controlled review cycle.

How it works

- Demo of OpenSpace review

What environments support OpenSpace reviewflow

Current

- On premise PleaseReview with On Premise SharePoint

End 2017

- Hosted PleaseReview with SharePoint Online

Future

- On premise PleaseReview integrated with DMS with On premise SharePoint
